

4-core optical fiber cable gyftzy

Overview

As a popular model in the communications industry for 25 years, the gyftzy-4-core to 48-core series of non-metallic flame-retardant optical cables are specifically designed for complex outdoor cabling environments. Its structure adopts a non-metal reinforced core + flame retardant. The structure of optical cables is to insert single-mode optical fibers into loose sleeves made of high modulus plastic filled with waterproof compounds, which are reinforced with metal components, loose sleeves, steel polyethylene adhesive sheaths, longitudinally wrapped. Advanced fiber optical cable lines and inspection equipments were imported from Switzerland,Finland,USA,Japan and other countries. Designed with a non-metallic reinforcing core and non-armored flame-retardant construction, this. Guangzhou Jiqian fiber optic cable co.,ltd is a high-tech company engaged in researching, manufacturing, selling communication products with our import and export rights. available in multiple specifications from 4 cores to 48.
