

# Active Optical Module QSFP28

## Overview

The Acacia QSFP28 100ZR optical module makes the benefits of coherent technology accessible to a wide range of applications such as access aggregation and campus/enterprise interconnects where a transition from 10G links to 100G is required to alleviate bandwidth constraints. Amphenol's 100G QSFP28 to QSFP28 Active Optical Cable assemblies are a reliable, cost and power efficient, integrated solution which is ideal for high density signal transmission typically seen in most storage, data centers and high performance computing applications with fiber cable length up to. DESIGNED FOR USE IN 100GB/S DATA RATE APPLICATIONS. COMPLIANT WITH THE SFF-8636, IEEE802. ● Hot-swappable input/output device that plugs into a 100G Gigabit Ethernet Cisco QSFP port. ● Interoperable with other IEEE-compliant 100GBASE interfaces where. Siemon 100G QSFP28 Active Optical Cable (AOC) assemblies offer a highly reliable and cost-effective alternative to transceiver assemblies available in lengths ranging from 0.5 m to 100 m, beyond the range of Direct Attach Copper Cables (DAC). These high performance and low power consumption AOCs. This guide provides the definitive roadmap for selecting, deploying, and troubleshooting QSFP28 transceivers while bypassing the painful trial-and-error phase.
