

Average cost of data center racks

Overview

A: In the US, a standard full rack (42U, 3-5 kW) runs \$900-\$2,500/month all-in at a Tier 3 facility, depending on market and term length. High-density racks (10-30+ kW) in top-tier markets can exceed \$3,000-\$6,000+/month before bandwidth and cross-connects. Colocation data center pricing depends on space, power, bandwidth, connectivity, redundancy, and location. In 2026, power has become the most consequential variable. 4% at year-end 2025, and pricing is increasingly. The cost of building a standard data centre has risen 47% since 2020. Understanding which cost structure applies to. Data center cost per MW in 2026: JLL's 2026 Global Data Center Outlook reports the average global construction cost is forecast to reach \$11. For AI-optimized facilities, costs can exceed \$20 million per MW due to advanced liquid cooling and higher power density. Average cost per rack in colocation ranges from under \$500/month to well over \$5,000/month, and the gap isn't random. It's a function of market, power density, bandwidth model, contract term, and whether the salesperson on the other end of the phone thinks you're a sophisticated buyer or a. The cost per single rack in the data center depends on a number of factors as follows: The barebones price of a normal server rack ranges from 1000 USD dollars to 5000 USD dollars depending on the material used to make it, its dimensions, as well as additional features that come with it. Real pricing data across major markets. Data centre costs are opaque by design.
