

Broadband fiber optic box connected to router

Overview

An ONT (Optical Network Terminal) is a white box that connects the fibre optic cable, providing access to the Full Fibre network in your property. The wall mounted unit and the router will need to be close. Remember earlier, when we said it needs to be near a double socket?

This is. This guide details the necessary physical and digital steps to connect your fiber line and activate your internet service. The technician installs the equipment by: Once the ONT is installed, the next step is to set up. In this article we'll break down how fiber internet is installed - from the network fiber drop outside your house to the in-home setup with your router and gateway - and what you should expect at each stage. Fiber optic internet is generally installed in the following 5 steps, which we'll dive. Is the cable that runs to the ONT flexible enough to fit neatly to the 90 degree angles around the door frame?

2.
