

Brunei Trapezoidal Cable Tray Quotation

Summary of Content

To obtain a quotation for trapezoidal cable trays in Brunei, suppliers must provide firm pricing in BND, comply with local and international standards, and include delivery, packaging, and certification details.

Supplier Options and Specifications

Local Procurement via Berakas Power Company (BPC): BPC has issued a Bill of Quantities for the supply and delivery of cable trays and accessories, which includes trapezoidal types. Bidders must submit firm prices in Brunei dollars (BND) inclusive of all costs such as shipping, insurance, taxes, and DDP delivery to BPC. Materials must be individually packed in seaworthy wooden crates, labeled with project details, manufacturer, country of origin, and date of manufacture. Only materials meeting the specified standards are accepted, and alternative materials are not allowed. Suppliers must provide factory details, quality control documentation, and valid transportation safety certificates for delivery acceptance . Material and Standards Compliance: Trapezoidal cable trays are typically manufactured from pre-galvanized, hot-dip galvanized, stainless steel, or aluminum. Thickness options range from 1.0 mm to 2.0 mm, and products must comply with BS EN 61537:2023, NEMA standards, and cabling standards such as CENELEC EN 50173-1, EIA/ITA 568 A, and ISO/IEC 11801-1:2017 . These standards ensure durability, corrosion resistance, and safe electrical installation. International Suppliers: Companies like Eurostrut and Thomas & Betts offer trapezoidal and other cable tray systems suitable for industrial and marine applications. They provide hot-dip galvanized or stainless steel trays, flexible configurations, and fast installation options. Quotations can be requested directly through their websites, and they often provide detailed product specifications, dimensions, and delivery options .
