

CIF price for long-distance optical cable G 652D

Summary of Content

The CIF price of G.652D optical fiber cable currently ranges around \$0.25 per foot, with bulk orders and international shipping affecting final costs.

Current Market Pricing

The approximate cost for standard G.652D fiber is \$0.25 per foot, which translates to about \$250 for 1,000 feet. Prices can vary depending on order volume, supplier, and shipping terms, with bulk purchases over 100,000 meters potentially reducing per-meter costs by more than 50%. Direct manufacturers often offer better pricing than distributors due to lower margins and fewer intermediaries.

Factors Affecting CIF Price

- **Global Demand:** Rising demand from FTTH deployments, 5G networks, AI data centers, and long-haul backbones has tightened supply, pushing prices higher.
- **Raw Material Costs:** Silica preform and copper costs directly influence the fiber price.
- **Logistics and Tariffs:** CIF pricing includes shipping, insurance, and freight, which can fluctuate based on port fees, import tariffs, and transportation costs.
- **Supplier Tier and Quality:** Tier-1 suppliers with verified quality certifications may charge a premium, while OEM factory distributors can offer competitive rates and customization options.
