

# Cable Tray Standard Specifications and Prices

## Summary of Content

Cable trays vary by material, type, size, and finish, with prices ranging from \$2 to \$25 per meter depending on specifications and application.

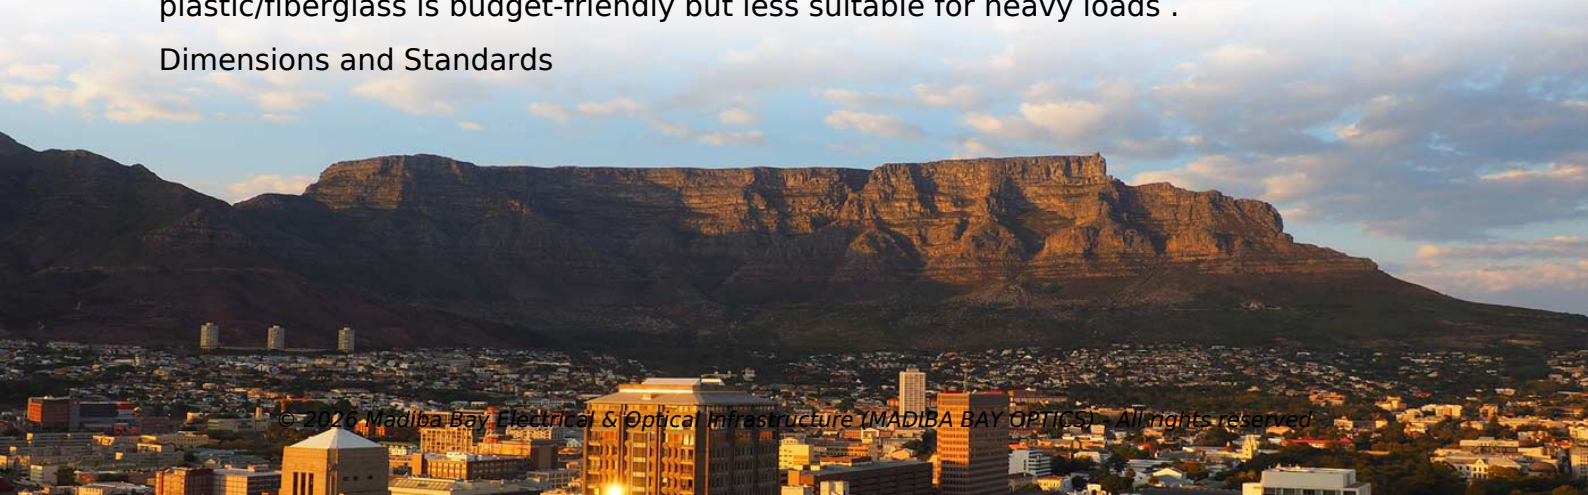

### Types and Materials

Cable trays are open support systems designed to carry and organize electrical, data, and control cables. Common types include:

- Ladder trays: Feature cross-members, ideal for heavy power cables and long spans .
- Perforated trays: Solid base with holes for ventilation, suitable for medium loads .
- Wire mesh trays: Lightweight, flexible, and cost-effective for light cabling .
- Cable trunking: Closed or semi-closed systems for protection in sensitive environments .

Materials commonly used are: galvanized steel, stainless steel, aluminum, and fiberglass (FRP/GRP). Galvanized steel balances cost and durability, stainless steel offers corrosion resistance, aluminum is lightweight and rust-proof, and plastic/fiberglass is budget-friendly but less suitable for heavy loads .
