

Cable fixed price in cable trays

Summary of Content

The price of cable trays with fixed cables varies widely depending on material, size, load capacity, and supplier, typically ranging from \$20 to \$200 per meter for standard industrial setups.

Factors Affecting Price

- **Material:** Steel (galvanized or stainless) is more expensive than aluminum or plastic, but offers higher load capacity and durability .
- **Tray Type:** Ladder-style trays for heavy power cables cost more than perforated or solid trays for lighter cables .
- **Cable Inclusion:** Pre-installed or fixed cables increase the cost significantly, as the price includes both the tray and the cable type (power, data, or control).
- **Size and Length:** Wider trays or longer runs increase material and labor costs. Standard widths range from 100 mm to 600 mm, and lengths are usually 2–3 meters per section .
- **Standards Compliance:** Trays meeting DIN EN 61537 or IEC standards may be priced higher due to certification and quality assurance .
- **Supplier and Delivery:** Prices vary by supplier and region. Online suppliers like RS, McMaster-Carr, and CEF offer different pricing tiers and shipping options .

Typical Price Ranges

- Plastic or halogen-free trays without cables: \$20–\$50 per meter .
- Steel or aluminum trays without cables: \$50–\$100 per meter .
