

# Cameroonian optical module QSFP-DD

## Overview

QSFP-DD is a new module and cage/connector system similar to current QSFP, but with an additional row of contacts providing for an eight lane electrical interface. It is being developed by the QSFP-DD MSA as a key part of the industry's effort to enable high-speed solutions. Cisco QSFP-DD and OSFP 800G ZR/ZR+ digital coherent optics modules enable 800G traffic over amplified Dense Wavelength-Division Multiplexing (DWDM) links up to 120 km for 800ZR and over 1000 km for 800G ZR+. These hot-pluggable transceivers provide high-density, high-performance connectivity. Smartoptics QSFP-DD transceivers provide cost-efficient 400G and 800G optical networking. As a. Optical Communications Engineer Chen Wei observed the monitoring dashboard until his frustration reached its peak. His 50 million dollar AI training cluster which contained 1024 advanced GPUs operated at 65 percent capacity. With its compact form factor, backward.
