

Can the fiber optic router be replaced

Summary of Content

You can replace your fiber optic router with a compatible third-party router, but it must connect to the ISP-provided ONT and support high-speed Ethernet and proper network settings.

Understanding Fiber Internet Setup

Fiber internet uses an Optical Network Terminal (ONT) instead of a traditional modem. The ONT converts fiber-optic signals into Ethernet, which then connects to your router. You cannot replace the ONT with a standard modem, but you can use almost any modern router that supports a Gigabit Ethernet WAN port and high-speed Wi-Fi standards like Wi-Fi 6 or Wi-Fi 7.

When to Replace Your Router

Consider replacing your router if:

- It is older than 3-5 years, as older routers may not support Wi-Fi 7 or handle multiple devices efficiently.
- You experience latency, buffering, or slow response on multiple devices.
- Your router cannot support the latest security updates, including post-quantum cryptography.
- You want better coverage, advanced features, or higher speeds for a device-heavy home network.

Choosing a Compatible Router

For fiber internet, ensure your router:

Article Content

Can I reuse my previous modem for my new fiber optic internet?

No, and usually fiber connections don't need a modem. Fiber is already a digital signal. There will be a converter to convert the fiber
