This Data Center Pricing Calculator will help reduce the many factors that go into the decision of whether to build a data center in-house or use a colocation provider. Strategic factors may include a business' sensitivity to cash flow, deployment timeframe, data center life expectancy, or. Edge data centers are computing facilities positioned at or near the “edge” of the network – the point where end users, devices, or sensors connect. These facilities typically range from small server closets to multi-rack deployments, though some edge locations grow to resemble traditional data. Supermicro offers the industry's broadest range of rackmount data center servers optimized for modern workloads including AI, HPC, Cloud, Storage and Edge. Most CTOs spend months hunting for a facility that ends up overpriced or wrong for their setup.
