

Dedicated cable trays for computer rooms and data centers

Overview

Perforated cable trays where support and airflow both matter. Putting huge numbers of cables into a data center. In a data center, you don't just need tidy lines; you need a system that keeps cables cool, accessible, and safe. Now, the real question: which tray type makes sense for your setup?

Ladder. With generously dimensioned cable trays, clear structures and flexibly expandable systems, you can create the basis for efficient data centre operation – regardless of whether it is a new installation, a conversion or the expansion of an existing data centre. More importantly, cable trays support modern data center design principles such. Snap Track® ventilated channel cable tray serves targeted applications within data center environments — auxiliary and support system cabling, retrofit and expansion projects, and facilities where industrial infrastructure intersects with IT operations. Turns, Tee's, rises and drops all can be quickly.
