

# Distribution Box Mobile Control Box

## Summary of Content

Mobile distribution boxes are portable power units designed for safe, flexible, and reliable electricity distribution in temporary or mobile applications.

### Overview

A distribution box or mobile control box is a compact, portable unit that allows the safe distribution of electrical power from a main supply to multiple devices or equipment. These boxes are widely used in construction sites, industrial maintenance, events, markets, and temporary installations where flexible power access is required .

### Key Features

- **Portability:** Equipped with handles, brackets, or suspension lugs for easy transport and setup .
- **Robust Housing:** Made from durable materials like impact-resistant polyamide or reinforced plastic to withstand mechanical stress, water splashes, and dirt .
- **Protection Ratings:** Typically IP44 or higher, ensuring protection against water and dust, suitable for outdoor and indoor use .
- **Circuit Protection:** Integrated circuit breakers (LS) and residual current devices (FI) safeguard connected equipment and users .
- **Socket Options:** Can include multiple types of sockets such as CEE 16A, CEE 32A, and 230V Schuko, often with hinged safety lids for added protection .
- **Temperature Resistance:** Designed to operate in a wide temperature range, e.g., -25°C to +40°C .
