

Distribution Box XB1

Summary of Content

The Distribution Box XB1 is a modular solution for decentralized power and signal distribution, offering flexible, reliable, and robust connectivity for industrial applications.

Overview

The XB1 distribution box is designed to provide safe and efficient distribution of power and signals in industrial environments. It supports modular configurations, allowing users to customize the box for specific applications, including sensor-actuator networks, decentralized automation, and power bus systems. The boxes are typically rated up to IP67, ensuring protection against dust and water ingress, making them suitable for harsh environments .

Key Features

- **Modular Design:** The XB1 can be configured with various modules for power, signal, or data distribution, enabling flexible installation and expansion .
- **Robust Construction:** High-quality materials ensure durability and reliable operation under demanding conditions .
- **Flexible Connectivity:** Supports multiple connection technologies, including screw, spring cage, and insulation displacement connections (IDC), reducing inventory and installation complexity .
- **Pluggable Modules:** Some XB1 systems, like the FieldPower® series, allow plug-and-play installation with “PUSH IN” contacts for cables ranging from 0.5 to 10 mm² .
