

Distribution boxes and enclosures

Overview

A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge. MARECHAL® electrical enclosures are designed for low voltage electrical installations. They are designed and manufactured to be installed in extreme environments and offer a high degree of modularity to meet a wide range of applications. Thanks to protection ratings and high quality ble (from 65 x 65 mm up to 361 x 254 mm) plus 3 different cover hei xes are available. TIMELEC is a professional distribution box manufacturer supplying metal enclosures and waterproof plastic distribution boxes for residential, commercial, industrial and PV projects. Our range covers flush-mounted and surface-mounted designs, 2 to 144 modular positions, IP40 to IP66 protection. The product range of enclosures and distribution boards includes service entrance boxes and pillars, small distribution pillars and standard cable distribution cabinets as well as low-voltage distribution boards. Our range of distribution boards provides utmost safety as per international standards.
