

Do I need to change my router when upgrading to 100M fiber optic internet

Overview

In this guide, we'll explain router compatibility, setup steps and whether upgrading your router is necessary to maximize fiber speeds. Key Takeaways: Yes, you can use your own router with fiber internet, as long as it has a Gigabit Ethernet WAN port to connect to your ISP's Optical Network. A key aspect of upgrading to Full Fibre broadband is ensuring you have the right router. Full Fibre connections involve fibre-optic cables running directly into your home, delivering higher speeds and more consistent connectivity than traditional broadband. This guide will break down everything you. With 100M optical fiber broadband, can I change the gigabit router to increase the network speed?

In fact, when you are using 100M broadband, changing to a gigabit router can not increase the speed of the wired network, but it can increase the speed of the wireless network.
