

Dutch franchise AI server 40G

Summary of Content

The Netherlands offers high-performance AI server options, including dedicated GPU servers and the upcoming Dutch AI Factory in Groningen, supporting large-scale AI workloads with European data compliance.

Dedicated GPU Servers in the Netherlands

For businesses or franchises seeking AI servers with high-speed connectivity (40G), several providers offer dedicated GPU servers:

- Trooper.AI provides EU-based GPU servers with options like NVIDIA RTX 4090 and A100, designed for AI and machine learning workloads. These servers are GDPR-compliant, secure, and optimized for high-performance AI tasks .
- Hetzner offers dedicated GPU servers with NVIDIA GPUs and CUDA support, suitable for AI model training, deep learning, and generative AI applications. Their servers are located in Europe and can handle large-scale AI computations efficiently . These servers are ideal for franchises or companies that need reliable, high-speed AI infrastructure without relying on foreign cloud providers.

Dutch AI Factory in Groningen

The Dutch AI Factory is a large-scale AI facility being developed in Groningen, fully operational by 2027. Key features include:

- A powerful AI supercomputer for training and developing advanced AI models .
- Access to high-quality Dutch and European datasets, ensuring compliance with European privacy and security standards .
