

Eastern European Low-Voltage Network Cabinets

Overview

HETR and HELK series cabinets are low-voltage distribution cabinets designed for low voltage switching, circuit protection, current limiting and electricity metering. Since the carrier frame is disassembled, it saves a lot of space in shipment. Our outdoor low voltage cabinets are designed for durability. Metal Substations HEKA compact substations (CSS) are delivered as fully integrated turnkey systems, making it easier to implement reliable medium-voltage grid connections with predictable quality and faster project execution. Designed for modern power distribution needs, they provide a robust. Engineered for performance and protection, our indoor cabinet range includes multi-service distribution boards (MSDB) and sub-main distribution boards, all built to ensure easy installation, space efficiency, and long-term reliability. MSDB Vertical Busbar - Note - This product is no longer. We are an international technology company and a family business, which enables green transition, reliable and safe supply of electricity by creating sustainable solutions for electricity distribution. Mitsubishi Electric Europe, a driving force in industrial automation technology in Europe for many years.
