

Electrical box with simple waterproof protection

Summary of Content

Outdoor waterproof electrical boxes protect wiring from rain, dust, and moisture, typically using ABS or polycarbonate enclosures with gasketed lids and IP54–IP67 ratings.

Key Features

Material: Most simple waterproof boxes are made from ABS plastic or polycarbonate, which are lightweight, impact-resistant, and UV-stable, preventing cracking or fading outdoors. Metal options like stainless steel or aluminum offer extra durability and corrosion resistance, ideal for coastal or high-traffic areas . **Waterproof Rating:** Look for IP54 to IP67 ratings.

- IP54: Protects against dust and splashing water, suitable for light rain or garden use.
- IP65: Resistant to low-pressure water jets, ideal for general outdoor exposure.
- IP66: Withstands high-pressure water jets, suitable for heavy rain or washdown areas.
- IP67: Can handle temporary submersion, perfect for flood-prone or marine environments . **Design:** Simple waterproof boxes often feature hinged lids with rubber gaskets, pre-drilled mounting holes, and cable entry ports with rubber seals to prevent water ingress. Some models include padlock holes for added security .

Applications
