

# Fiber Optic Cable Bracket Price

## Summary of Content

Fiber optic cable support brackets typically range from \$2 to \$50 per unit, depending on type, material, and application.

### Overview of Bracket Types and Pricing

**Indoor Mounting Brackets:** These include cable lacing shelves, D-ring brackets, and fiber optic clips used in racks or enclosures. Prices generally range from \$5 to \$25 per bracket. For example, Kendall Howard cable lacing shelves support up to 10 pounds of cable and are made of sturdy materials suitable for server racks . **Outdoor or Aerial Brackets:** Brackets for pole line or aerial fiber installations, including clamps, straps, and mounting hardware, are typically made from galvanized steel, aluminum alloy, or UV-resistant thermoplastics. Prices for these brackets range from \$10 to \$50 per unit, depending on size, material, and load capacity . **Specialty Fiber Brackets:** Fiber optic clips and guides designed for strain relief or splice protection can cost \$2 to \$15 each, depending on the number of splices they hold and installation method (adhesive pad or screw mount) .

### Factors Affecting Price

- **Material:** Stainless steel and aluminum alloy brackets are more expensive than thermoplastic or basic steel options.
- **Load Capacity:** Brackets designed to support heavier cable bundles or multiple splices cost more.
- **Application:** Indoor rack-mounted brackets are generally cheaper than outdoor or aerial-grade brackets due to environmental durability requirements.
