

Fiber Optic Cable Installation Folding Board

Overview

These portable folding work tables are designed by and for outside plant technicians to provide the perfect work surface for fiber optic splicing and cable termination in the field or in the datacenter. You should pull on the fiber cable strength members only! Never exceed the maximum pulling load rating. On long runs, use proper lubricants and make sure they are compatible with the cable jacket. In general, fiber optic cable can be installed with many of the same techniques used with conventional copper cables. For example, physical hazards such as high temperatures or operating. This guide will explain the entire set of activities involved in installing Fiber optic cable contractors -from the early planning stage right through testing-for facility managers, IT teams, and low-voltage contractors to build high-performance networks safely and efficiently.
