

Fiber Port 3700 Switch

Summary of Content

The 3700 series fiber switches, including HPE SN3700B, Hikvision DS-3E3700-H, and D-Link DGS-3700, offer high-density fiber connectivity with scalable performance for enterprise and SMB networks.

HPE Storage Fibre Channel Switch B-series SN3700B

The HPE SN3700B is a 64Gb Fibre Channel switch designed for small to mid-sized enterprise storage networks. It features 24 SFP+ ports supporting 8, 16, 32, and 64 Gbps Fibre Channel speeds, with flexible Ports on Demand (PoD) allowing scaling from 8 to 24 ports . The switch supports NVMe storage with low latency (460 ns) and is optimized for hyper-scale virtualization, cloud infrastructures, and all-flash storage environments. It is a 1U form factor switch, offering high port density and operational simplicity with three-step configuration .

Hikvision DS-3E3700-H Series

The DS-3E3700-H series provides 24 or 48 Gigabit ports and 4 fixed 10GE fiber ports, with an expansion slot for additional modules . It supports IPv4/IPv6 dual-stack, advanced routing protocols, multicasting, and policy-based routing. The switch includes virtualization redundancy, hot-swappable dual power supplies, and link redundancy protocols (LACP, STP, RSTP, MSTP, Smart Link) to ensure high reliability and uninterrupted traffic flow. It is suitable for distribution or core layers in SMB and large networks .
