

Fiber optic adapter ST connector

Summary of Content

An ST fiber optic adapter is a passive device that connects two ST-terminated fiber optic cables, ensuring precise alignment and low insertion loss.

Overview

ST (Straight Tip) fiber optic adapters, also known as couplers or mating sleeves, are used to join two ST fiber connectors in a network. They are widely used in legacy Ethernet, industrial control, and military fiber networks and are compatible with both single-mode and multimode fibers. The adapter ensures that the fiber cores are precisely aligned, which is critical for maintaining low insertion loss and high signal integrity.

Key Features

- Connector Type: ST (female to female)
- Coupling Mechanism: Bayonet-style twist-on/twist-off for secure connection
- Material: Metal or plastic body with zirconia ceramic alignment sleeves for precise fiber alignment
- Configurations: Simplex (single fiber channel) or duplex (two fiber channels side by side)
- Insertion Loss: Typically
