

Fiber optic cable fiber sequence

Overview

For optical fiber cables, each individual fiber is color-coded in a specific sequence to facilitate easy identification. The standard color sequence is based on a 12-fiber system, which repeats for cables with higher fiber counts. Color Code for 12 Fibers: Blue Orange Green Brown. WolonFiber's 12-Color Fiber Optic Pigtail Packs are manufactured strictly to the TIA-598-C standard with vibrant, easy-to-identify colors. Perfect for fast, error-free termination in your ODF or splice closures. Available in OS2/OM3/OM4 at factory-direct wholesale pricing. With clear tables and updated details, it serves as a comprehensive reference for technicians handling modern fiber optic installations. Fiber optic cables are the arteries of modern communication—from data centers to factories, these slim strands of glass move terabits of information every second. But with thousands of fibers in a single cable, color coding is your universal translator.
