

Fiber optic patch panel professional equipment

Overview

Full patching platforms include FX ECX for LAN environments, FX UHD for high-density fiber channels and the DCX System used primarily in data centers where high amounts of fiber connections and density are the key requirements, as in optical distribution frame installations. Consolidate your fiber optic connections in industrial environments with our DIN rail patch panel, with a modular design and tool-free installation save space and simplify deployment. Tailored colors, shapes, and materials to meet your exact specifications. A fiber optic patch panel is a mounted hardware unit that organizes and manages fiber optic cable connections in a network infrastructure. If you're considering purchasing one for your organization, here's what you need to know: What is it?

A fiber optic patch panel serves as the critical interface. Belden offers several Fiber Patching Systems.
