

Fiji Optical Cable Renovation Plan

Overview

People in the North will have high speed and reliant internet service in the next five years as Telecom Fiji has launched their 5-year Labasa-Savusavu Fiber Project where they will extend the underground fiber optic cable network from Labasa to Savusavu. The FOA created its Online Reference Guide to provide a more up-to-date and unbiased reference for those seeking information on cabling and fiber optic technology, components, applications and installation. As part of this phase 90 km of optic fiber cables will be laid between Seqaqa and Savusavu. Telecom Fiji CEO Charles Goundar says that this is part of the five-year fibre investment plan, which focuses on. In August 2024, this Strategic Plan for the Telecommunications Authority of Fiji (“TAF” or “the Authority”) was launched with the intention to support Fiji's digital enablement and position the country as a pioneer of digital development within the region. This plan recognises the. ng infrastructure investment over the next 5-10 years. Picture: FIJI GOVERNMENT Decades of depending on microwave links for connectivity.
