

Guinea Explosion-proof Distribution Box Model

Summary of Content

Guinea explosion-proof distribution boxes are designed for safe power distribution in hazardous areas, offering durable, certified enclosures suitable for industrial applications.

Overview

Guinea explosion-proof distribution boxes are engineered to safely distribute and control electrical power in hazardous environments, such as chemical plants, refineries, offshore platforms, and areas with combustible gases or dust . These boxes are typically ATEX and IECEx certified, ensuring compliance with international safety standards for explosive atmospheres .

Materials and Construction

- **Enclosure Materials:** Commonly made from stainless steel (304 or 316L) or Q235 steel, providing corrosion resistance and mechanical strength .
- **Flameproof Design:** Many models feature Ex d (flameproof) or Ex e (increased safety) enclosures, preventing ignition of surrounding hazardous atmospheres .
- **Hinged Structures:** Specialized hinges protect flameproof joints during opening and closing, extending service life .

Typical Models and Series

- **GUB Series:** Designed for chemical and petrochemical plants, offshore platforms, and refineries, suitable for gas and combustible dust environments .
