

High-quality 45-degree elbow cable tray

Summary of Content

High-quality 45-degree elbow cable trays are designed to change cable direction smoothly while minimizing bend radius, available in materials like FRP, stainless steel, and carbon steel for industrial, marine, and harsh environments.

Overview

A 45-degree elbow cable tray is a fitting used to redirect cables or conduits at a 45-degree angle, ensuring smooth routing around corners or obstacles and preventing cable damage due to sharp bends . These elbows are essential in maintaining proper cable management in industrial, offshore, marine, and heavy-duty applications.

Material Options

- Fiber-Reinforced Plastic (FRP): Lightweight, corrosion-resistant, suitable for offshore, marine, and harsh environments .
- Stainless Steel (SS304): Brushed finish options are ideal for applications requiring frequent washdowns or high hygiene standards, such as food processing or pharmaceutical facilities .
- Carbon Steel: Often electroplated or zinc-coated for durability, suitable for general industrial use .

Compatibility and Standards

- Ladder Tray Systems: 45-degree elbows are available for I-beam ladder trays, compatible with NEMA Classes 12B, 12C, 20A, 20B, 20C, and higher, ensuring proper fit and structural integrity .
