

How much does a 10GE optical module cost

Overview

As a general range, the cost can span from approximately \$30 to \$100 or more per module. Costs can vary widely depending on factors such as brand reputation, optical component quality, supported features like Digital Diagnostics Monitoring (DDM), and the specified operating. The price of a 10G SFP+ module typically ranges from low double digits to several hundred dollars, and in some cases even higher. This wide gap is not random—it is mainly driven by transmission distance, brand strategy, compatibility requirements, and optical technology. Compatible 10G SR SFP+ modules often sell for tens of dollars, while genuine OEM modules or long-reach (LR, ER) DFB parts push into the hundreds. 10G optical modules play a critical role in enabling high-speed fiber optic transmission. Svelol's 10G SFP+ optical modules incorporate the latest optical chip and packaging technology to deliver lower power consumption. 10GBASE Active Optical SFP+ Cable, 2M. 10GBASE-LR SFP Module REMANUFACTURED.
