

How to connect and set up a router for a newly installed fiber optic broadband connection

Summary of Content

To install a router for fiber optic broadband, connect the Optical Network Terminal (ONT) to your router via Ethernet, power both devices, and configure your Wi-Fi network for optimal performance.

Step 1: Prepare the Equipment

Before starting, ensure you have the following:

- Optical Network Terminal (ONT) provided by your ISP
- Compatible router with a WAN or SFP port labeled for fiber or ONT input
- Fiber optic cable (usually yellow with SC/APC or SC/UPC connectors)
- Ethernet cable (Cat6 or higher recommended)
- Optional: UPS or surge protector to safeguard your devices

Step 2: Install the ONT

- Locate the fiber optic wall outlet where the ISP's fiber line enters your home.
- Connect the fiber optic cable from the wall outlet to the ONT's designated port.
- Plug in the ONT's power adapter and wait 2-5 minutes for the status lights to stabilize.
