

How to install a fiber optic box without a splitter

Overview

This guide walks through a practical, real-world installation process used in FTTH deployments. Covers mounting, splicing, routing, labeling, and testing for indoor/outdoor use. Installing a fiber optic termination box is one of those jobs that looks simple on paper, but it's easy to do poorly in the field. What is an FTTH Indoor Fiber Optic Wall Box?

An indoor FTTH wall box is a compact, durable enclosure (ABS plastic or. In this guide, we'll break down the fiber installation process from start to finish and explain key components such as fiber cabinets, flower pods, ducting, and ONT setup. Running fiber internally involves extending this high-speed link from the service entry point to a centralized location, such as a dedicated media closet or network rack. It functions as a junction between the incoming fiber cable and the outgoing customer-side fiber cable, where one fiber can be spliced, patched.
