

Huawei Core Switch Packaging

Summary of Content

Huawei core switches are shipped in secure, modular packaging designed for safe transport, rack installation, and high-density deployment in enterprise and data center environments.

Packaging Overview

Huawei core switches, such as the S12700, S9300 ING Series, and Terra Series SST3200-12K-C, are packaged to ensure protection during shipping and ease of installation. The packaging typically includes:

- Shock-absorbing materials to protect the chassis and line cards from impact during transport.
- Anti-static bags for sensitive components like optical modules and processor units.
- Rack mounting brackets and screws for standard 19-inch server racks.
- Cable management accessories to organize network connections and prevent strain on ports.
- Documentation including installation guides, safety instructions, and warranty information .

Installation and Handling

Huawei emphasizes proper handling to maintain switch integrity and performance:

- **Rack Mounting:** Core switches are designed for standard 19-inch racks. Ensure the rack is level, securely anchored, and capable of supporting the switch's weight. Use the provided mounting brackets for stability .
