

Huawei Smart World Power Distribution Box

Summary of Content

The Huawei Smart World Power Distribution Box is an intelligent, modular power distribution solution designed for safe, efficient, and automated energy management in residential, commercial, and industrial settings.

Overview

Huawei's Smart World Power Distribution Box integrates advanced monitoring, automation, and protection features to provide stable, safe, and intelligent power distribution. It is part of Huawei's broader Intelligent Distribution Solution, which enables transparent sensing of transformer districts, real-time monitoring, and enhanced service capabilities for users. The system supports both standard and critical loads simultaneously, ensuring uninterrupted power supply in backup scenarios.

Key Features

- **Dual DC Inputs and Outputs:** Models like the DPD100-2-20 support two DC power inputs ranging from -48 V DC to -60 V DC, with a maximum current of 100 A per input. The PDB distributes dual-10 DC outputs with internal surge and overcurrent protection.
- **Modular Design:** Components include a plastic front panel, circuit breakers, guide rails, subrack components, and wiring terminals, allowing flexible installation and maintenance.
