

IPS Integrated Power System

Summary of Content

IPS Integrated Power Systems provides comprehensive power solutions, including electrical, mechanical, and renewable energy systems, for residential, commercial, and industrial applications.

Overview

IPS Integrated Power Systems (IPS) specializes in delivering reliable energy solutions across clean and traditional power systems, including electromechanical equipment repair, field services, and power management solutions. They operate across North America, the UK, and the Caribbean, serving industries such as mining, utilities, and commercial enterprises . IPS also acquired ABB's Industrial Services business and National Switchgear, expanding their capabilities in power distribution and switchgear services .

Products and Services

IPS offers a wide range of products and services, including:

- Power Distribution Equipment: Circuit breakers, transformers, switchgear, and custom-built distribution systems .
- Backup Power Solutions: Single & three-phase systems, low & medium voltage, VRLA or Lithium-Ion batteries, rotary units with flywheel backup, and Battery Energy Storage Systems (BESS) for grid stability and renewable integration .
- Enclosures and Thermal Management: E-houses, harsh environment enclosures, NEMA-rated metal and polycarbonate enclosures, filter fans, chillers, and heat exchangers .
