

ISon Industrial-Grade Switches

Overview

5KV Hipot for port isolation □ -40~75°C operating temperature □ 100% burn-in process □ Rugged Fan-less Design □ Innovated functions – I. Chain (Intelligently Active Ring/Chain) □ High level security – ACL, QCL, VCL, and etc. □ Easy to use, user friendly Design. □ 1. ISON Technology focus on Industrial Networking we play an important role in system planning & design for automation applications To smoothly and safely operate a modern factory, a combination of different systems with various functions need to be implemented to ensure its smooth and safe operation. 19" Rackmount Managed Switches combine high performance, flexibility, and a large set of intelligent tools for network configuration, diagnostics, and monitoring. DIN-Rail Mounted Unmanaged Switches widespread budget solution for building industrial networks. These devices do not require any. ISON Industrial Switch's unique product features □ 2KV Surge immunity on RJ45 ports. With plug-n-play, easy to use, and its compact size, the IS-DF310 Series can easily be used in factory production line, embedded into machine system. ISON stands for "Industrial Solution Over Network".
