

Installation Method of 8-Port Industrial Switch

Overview

Switches are fixed to walls or cabinet interiors using screws or hooks. Flexible placement: Choose mounting height and position based on site needs. The keepLiNK 8-Port Industrial PoE Switch is an unmanaged Gigabit Power over Ethernet (PoE) switch designed for robust and reliable network connectivity in demanding environments. It features 8 Gigabit PoE+ ports and 1 Gigabit SFP slot, providing flexible options for connecting various network. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including the interference that may cause undesired operation. Marking by the symbol indicates compliance of this equipment to the EMC.
