

Installation Solution for Denmark's IK10 Four-Port Information Panel

Summary of Content

For Denmark's IK10 four-port information panel, use a certified IK10 enclosure with IP66/IP67 protection, compatible wall-mounting options, and PoE-enabled network integration for secure, vandal-resistant installation.

Enclosure Selection

Choose an IK10-rated enclosure to ensure maximum impact resistance, capable of withstanding up to 20 joules, which is ideal for public or industrial environments such as factories, transport hubs, or outdoor kiosks (Rocktech) . Enclosures can be made from glass-fibre-reinforced polyester (GRP) or stainless steel (AISI 316L) for durability and corrosion resistance, with options for transparent or opaque hinged doors to allow display visibility while maintaining protection (DirectIndustry) . Ensure the enclosure meets IP66/IP67 standards for dust and water ingress protection, especially for semi-outdoor or harsh environments (Marechal) .

Mounting and Wall Integration

For Denmark, standard EU-type wall boxes are compatible with most industrial panels. Panels can be mounted directly onto existing wall boxes without additional adapters, reducing labor and installation costs (Portworld) . Ensure the enclosure is securely anchored to a solid surface, and consider vibration-damping mounts if installed near heavy machinery or high-traffic areas.
