

Integrated power supply cabinet UPS power supply

Overview

An Uninterruptible Power Supply (UPS) integrated cabinet is a comprehensive, self-contained power protection solution that combines a UPS system, power distribution units (PDUs), battery modules, monitoring systems, and often environmental controls into a single enclosure. We are your specialist when it comes to UPS systems in control cabinets or wall-mounted enclosures. It doesn't matter whether you need only a few minutes or several hours of bridging time, for example. Our engineering supports you from the first minute and works out the perfect UPS solution in the. MPI Energy integrated battery cabinet solution offers a turn-key battery and battery cabinet option for UPS battery backup. Cabinet solutions can be equipped with an optional circuit breaker for either. A trouble-free power supply is required wherever electrical energy must be available at all times and protection has to be provided against a temporary mains failure or mains disturbance.
