

Integrated utility tunnel cable tray support

Overview

It is a modular tunnel support system that allows the installation of all equipment, such as electrical, mechanical, walkways, and handrails, on a single support. For energy distribution and cable management in tunnelling and rail systems, EAE offers long-lasting, reliable and efficient solutions. Compact busbar systems provide efficient energy transmission in confined spaces, while corrosion-resistant cable trays enable organised and accessible cable. Cable trays provide a support structure to lay out cables across hundreds of meters, without the likelihood of sagging or becoming tangled, or even getting in contact with the rough tunnel walls. This improves overall electrical cable organization in tunnels, making inspections and repairs. Professional cable management is crucial for the safety, functionality and longevity of tunnel equipment. Cable trays may carry power, lighting, ventilation, communication, control, monitoring, and. ass reinforced polyester) cable trays. By mounting multiple pieces of equipment on a.
