

Iranian low-power optical module 1G

Overview

Featuring a built-in Semtec chip and reliable FP laser / PIN receiver, the SFP module delivers low power consumption and stable optical links for 1G single mode networks like Gigabit Ethernet and Fibre Channel. You can rest assured regarding quality and warranty. A 1G SFP (Small Form-factor Pluggable) module is a compact, hot-swappable transceiver used in data communication and telecommunications networks to connect switches, routers, and network interface cards (NICs) via fiber optic or copper cabling. These modules are essential for expanding network.
