

Is it normal for a fiber optic router to show a red light

Overview

Red lights on the router signal serious connectivity problems. A solid red light indicates no internet connection or failed connection to your service provider's network, possibly from service outages, fibre signal issues, or route issues.

Understanding LED Indicators on a Fiber Router Let's break down what the common LED lights on a fiber router mean and how they behave: 1. POWER Normal: Solid/stagnant light. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. A red LOS (Loss of Signal) light on your router or ONT usually indicates that the device is not receiving an optical signal from the fiber network. This article explains the common causes, step-by-step troubleshooting methods, and when to contact your broadband provider to restore your internet. Whether your modem is blinking orange, your router has a solid red light, or you are staring at a mysterious "DS" indicator, you will find the answer below. But don't despair! This guide will walk you through the most common causes of router.
