

Latvia Delivery Date for Fiber Ethernet Switch OSFP

Summary of Content

OSFP 800G transceivers are available in Latvia, with local stock in Riga, enabling prompt delivery depending on order size and shipping method.

Availability in Latvia

The NVIDIA OSFP transceiver module 980-9I51A-00NS00, supporting 800 Gigabit Ethernet over 50 km, is available at AiO.lv in Riga, Latvia, with 168 units in stock and a total of 604 units available for order. The vendor is located at 2b Kengaraga Street, Riga, LV-1063, which allows for local pickup or expedited shipping within Latvia.

Estimated Delivery

While the exact delivery date depends on the vendor's shipping method and order processing, local stock in Riga suggests that standard delivery within Latvia could take 1-3 business days for small orders. Larger orders or bulk shipments may require additional processing time. It is recommended to contact AiO.lv directly to confirm the delivery schedule and shipping options.

Technical Considerations

The OSFP module is designed for high-density data center interconnects and supports pluggable OSFP-compatible ports. It is optimized for single-mode fiber transmission up to 50 km, suitable for backbone, aggregation, and high-throughput network environments. Ensure that your switch or router supports the OSFP form factor and that fiber connectors match the single-mode type used in your network.
