

# Laying 144 fiber optic cable on cable tray

## Overview

While there are several specific types of listings for power cables, specifically for tray applications, there is no equivalent tray rating for optical fiber cables. According to the 2014 National Electric Code® (NEC), any listed optical fiber cable is acceptable. PLEASE KEEP THIS GUIDE FOR FUTURE REFERENCE FIBER OPTIC CROSS CONNECTION CABINET 144, 288 AND 576 FIBER. 0 SCOPE Fiber optic cross connect cabinet is an outdoor optical equipment that is especially designed for outdoor optical nodes in access network. Page 2 Fig 1 □ Put the fiber optic cable. Minimize mechanical pressure on the outer sheath at crossing points: (armoured) cables crossing each other generate points of high pressure, so it is important when laying in figure 8 loops it is done in a correct way. When laying loops of fiber on a surface during a pull, use “figure-8” loops to. Proper technique is placing or laying a cable in a cable tray or raceway. Use fiber optic cable lubricant. Lubrication reduces the pulling load and the chance of breakage.
