

Length of 10 Gigabit Multimode Fiber Optic Cable

Overview

The Cisco 10GBASE-SR module supports a link length of 26 meters on standard Fiber Distributed Data Interface (FDDI)-grade Multimode Fiber (MMF). Using 2000 MHz * km MMF (OM3), up to 300-meter link lengths are possible. Cisco SFP+ modules offer the following features and benefits. Exceed it and you get bit errors, dropped packets, or total signal loss — no warning lights, no graceful degradation. The ceiling depends on the fiber grade, the data rate, and the real-world losses in your cable path. This guide covers the. Polish type: UPC Fiber mode: Multimode 50/125-micron OM3 Fiber count: 12 Cable jacket: LSZH PVC Insertion loss: ≤ 0.35 dB Return loss: ≥ 20 dB Cable diameter: 3. While OM1 is suitable for lower data rates, its bandwidth limitations make it less ideal for higher-speed applications like 10 Gigabit. The Cisco® 10GBASE SFP+ modules (Figure 1) give you a wide variety of 10 Gigabit Ethernet connectivity options for data center, enterprise wiring closet, and service provider transport applications.
