

# OEM Network Rack Flame Retardant

## Overview

Fire-resistance housing made of non-combustible building material A2 for basic protection of IT, communication and network systems in 19" racks. Fire resistant separations can be created within existing IT rooms through up to 47 units high, flexible enclosures of racks. Consumers often ask themselves how the entire IT can be placed in a compact server cabinet without sacrificing classic data center components such as UPS, fire protection and air conditioning?

The IT-Safe offers the optimal solution here – so that your IT as well as servers and networks remain. Flame Retardant Material: The flame retardant plastic material enhances safety by reducing the risk of fire in data center environments. 19 Inch 1U Size: The 19-inch 1U size ensures compatibility with standard network racks, making installation and integration straightforward. 19" Network Racks. Ningbo YOSUN Electric Technology Co. is a professional power solution provider of Power Distribution Units (PDU)for Data centre, located in Ningbo, China.
