

OPGW gold tool 24 cores

Overview

An overhead earth/shield wire integrated with a 24-fibre optical core (center-tube; G. 655 fibres to order) — grounding and grid telecoms in a single span, in 10. Tell us the standard, size and alloy you need. The Central Tube Optical Ground Wire (OPGW) is surrounded by single or double layers of aluminum clad steel wires (ACS) or mix ACS wires and aluminum alloy wires, 24 Core OPGW Cable design is fully adapted to the most common electric line needs. It is best suited to applications with moderate to low span ut increasing fibre strain. Because of this, OPGW contains exposed elements made of both. Fiberon OPGW is one of the most reliable fiber optic mediums for the telecom service providers, ISPs, Cable TVs, or other organizations who are involved in the transmission of one or more form of voice, data, video, text, messages, conferencing and telemetering kind of things.
