

Palau Smart Building Fiber Optic Cable Manufacturer

Summary of Content

Belau Submarine Cable Corporation (BSCC) is the primary provider of fiber optic connectivity in Palau, supplying the infrastructure that supports smart building networks.

Overview of BSCC

The Belau Submarine Cable Corporation (BSCC) is a state-owned public corporation established in 2015 and operational since 2016 to manage Palau's submarine fiber optic cable network . BSCC owns and operates the Palau Cable 1 (PC1), a 200 km submarine cable connecting Palau to the SEA-US cable system in Guam, which became operational in 2017 . The corporation is also constructing Palau Cable 2, a branch of the Echo submarine cable network, which will provide direct connections to Singapore and the mainland United States, enhancing bandwidth, redundancy, and reliability .

Role in Smart Building Connectivity

BSCC's submarine cables deliver high-speed, low-latency broadband capable of supporting advanced digital infrastructure, including smart building systems. The landing station at Ngeremlengui serves as the main capacity access point, providing up to 100 Gbit per second wavelength channels, which can be scaled to meet commercial and governmental demands . This infrastructure enables smart buildings to integrate IoT devices, automated systems, and high-bandwidth applications efficiently.
