

Patch cord fiber optic short

Overview

A fiber patch cable is a fiber optic cable with connectors on both ends. They are also called fiber jumpers. Used to connect optical transceivers ↔ transceivers, switches ↔ patch panels, or cross-connect. As networks move to higher speeds and higher density, choosing the right fiber optic patch cords becomes critical to the reliability of your system. When I first got into this industry, I didn't think much of them. But the more I worked with them, the more I realized—there's. GT-SCSCDM4A-xM fiber optic patch cords are ideal for short distance patching applications. These fiber optic cables have been built to exceed industry standards tested for insertion loss and reflectance on within UL certified OFNR (Riser) rated jacket with Kevlar yarn, and are factory terminated.
