

# Price List for Custom Aluminum Alloy Cable Management Frames

## Summary of Content

Custom aluminum alloy cable management frames typically range from \$20 to \$200 per unit, depending on size, alloy, and customization level.

### Pricing Overview

The cost of custom aluminum cable management frames varies widely based on several factors:

- **Material Grade:** Common alloys include 6061-T6 and 6063-T5, which are strong, corrosion-resistant, and comply with ASTM and EN standards . Higher-grade alloys or specialized treatments (anodizing, powder coating, or electrophoretic coating) increase the price .
- **Size and Design Complexity:** Larger frames or intricate profiles (L-shaped, U-shaped, T-shaped, or perforated designs) require more material and machining, raising costs .
- **Customization:** Fully custom frames, including CNC machining, precise tolerances, or unique surface finishes, are more expensive than standard modular trays or profiles .
- **Quantity:** Bulk orders reduce per-unit cost, while small or prototype runs are more expensive due to setup and machining overhead .
- **Surface Treatment:** Anodized, powder-coated, or wood-grain finishes improve durability and aesthetics but add to the cost .
