

Price List for Steel Ladder Cable Trays in the UAE

Summary of Content

Ladder-type steel cable trays in the UAE typically range from AED 150 to AED 500 per meter, depending on material, finish, and load capacity.

Overview

Ladder-type cable trays are widely used in commercial, industrial, and infrastructure projects across the UAE for supporting and routing electrical cables. They consist of two longitudinal side rails connected by cross-rungs, providing high load-bearing capacity and excellent ventilation for cables. These trays are suitable for long, straight cable runs with minimal bends, and are commonly used in high-rise buildings, data centers, oil and gas facilities, and industrial plants.

Factors Affecting Price

- Material and Finish
 - Mild Steel: Standard option, often powder-coated or pre-galvanized, generally more affordable.
 - Hot-Dip Galvanized Steel: Offers superior corrosion resistance, suitable for outdoor or marine environments, typically higher in cost.
 - Stainless Steel: Premium option for highly corrosive environments, significantly more expensive.
- Tray Size and Load Capacity
 - Widths commonly range from 100 mm to 600 mm.
 - Heavy-duty trays designed for high cable loads cost more than standard trays.
